

**PRODUCT DESCRIPTION**

**Holding Power Comparison**

With Ecoduty stakes, there is finally a quality, durable biodegradable option to anchor erosion control blankets, landscape fabrics, jute matting, turf and sod.

**FEATURES**

- Oxo-degradable meaning it will breakdown due to an additive in the plastic and then will biodegrade completely from micro-organisms
- Ribbed design for superior holding power
- Made from recycled resins to take other's scrap and put it back into the environment safely.

**APPLICATIONS**

- Highway construction
- Sod installation
- Turf installation
- Environmentally sensitive areas
- Riverbank erosion construction jobs
- Landscaping

**CERTIFICATIONS**

- Compliant with ASTM D6954 for biodegradation through microbes leaving carbon dioxide, water and humus as byproducts.

**PACKAGING**

- Available in 4 and 6 inch lengths
- Cases of 1000 or 500
- Retail quantities available as well
